SUMMARY

Final-year Information Technology student at MIT, Anna University, with industry experience at HSBC and research experience at IIT Bombay. Experienced in software engineering and machine learning, with hands-on experience building production-grade monitoring, alerting, and predictive analytics systems. Strong interest in backend engineering, distributed systems, and AI-driven solutions.

EXPERIENCE

Undergraduate Research Fellow - IIT Bombay

Nov 2024 - Sep 2025

- Worked on transformer-based architectures for emotion recognition in conversational datasets.
- Built and optimized data processing, training, and evaluation workflows.
- Performed model benchmarking and experimentation to improve classification accuracy.

HSBC Summer Internship

Jun 2026 - Jul 2026

- Contributed to enterprise software development within a global banking environment.
- Developed a predictive alerting platform for enterprise messaging infrastructure (Solace).
- Built a security remediation copilot to automate fixes for critical open-source vulnerabilities.

PROJECTS

Solace Monitoring System – HSBC (Java, Python-LightGBM, React, Solace)

- Built a monitoring platform for Solace messaging infrastructure, currently used by the team for operational monitoring.
- Developed a champion-challenger predictive rule engine for proactive alerting and issue detection

CUMTA – AI-Based Smart Traffic System (YOLOv8, OpenCV)

- Built an AI-based signal and pattern analyser using YOLOv8 and OpenCV on real traffic footage
- Designed for congestion detection under a government-backed smart mobility initiative.

Jarvis – AI Desktop Assistant (Python, Gemini API)

- Developed a modular AI desktop assistant integrating conversational AI, command execution, and persistent memory systems.
- Built automation, logging, and context-management modules to enable task execution and personalized interactions.

SKILLS

Languages & Tools: Python, Java, SQL

Frameworks & Libraries: TensorFlow, OpenCV, NumPy, Pandas, Transformers

Domains: Machine Learning, Backend Development, Enterprise Software Development

EDUCATION

B.TECH Information Technology

Aug 2023 - July 2027

Madras Institute of Technology, Anna University

- CGPA: **8.30**
- Relevant Coursework: DSA, Object-Oriented Programming (OOP), Operating Systems, DBMS, AI/ML

ADDITIONAL INFORMATION

- **Languages:** Tamil, English, Hindi
- **Certifications:** NPTEL – Python for Data Science | NPTEL – Programming in Java | Supervised ML
- **Achievements:** 🏆 1st Place – Prayatna'25 Hackathon, Dept. of Computer Tech, 🧑 Represented college chess team; Zonal Champions and Inter-Zonal Runners-up (2024)
- **Hobbies/Interests:** FIDE-rated chess player, astronomy enthusiast, numismatics (coin collecting), stock market investing
