

AJAY KRISHNA

INFORMATION TECHNOLOGY UNDERGRAD

Chennai , Tamil Nadu | prasannaajaykrishna@gmail.com | [Linkedin](#) | [Github](#)

SUMMARY

AI/ML Engineer with experience in deep learning, sentiment analysis, and autonomous systems. Currently a research fellow at IIT Bombay, working on a sentiment analysis chatbot. Developed an autonomous drone navigation system, an AI-driven drug acceleration project, and Jarvis, an advanced automation assistant. Certified in supervised learning, passionate about AGI and IoT automation.

PROFESSIONAL EXPERIENCE

AI/ML Fellowship, IIT Bombay

Nov 2024 - Present

- Currently working on a sentiment analysis chatbot using neural networks.
- Applying deep learning techniques to enhance sentiment classification accuracy.
- Exploring optimization strategies to improve model performance.

PROJECTS

Jarvis – AI Automation Assistant

- Developed an AI assistant with advanced command execution and parallel processing.
- Automated system tasks, email management, and performance optimization.
- Planned future IoT integration for home automation.

AI-Driven Drug Acceleration

- Designed a neural network model to predict drug efficacy and reduce trial durations.
- Achieved improved prediction accuracy by fine-tuning hyperparameters.
- Analyzed drug compounds to accelerate discovery timelines.

Autonomous Drone Navigation

- Developed a drone navigation system using Reinforcement Learning (PPO), enabling the drone to autonomously navigate between multiple points.
- Optimized the model for obstacle avoidance and efficient pathfinding without using ROS.

SKILLS

Python	Machine Learning	Automation, System Optimization
SQL	Deep Learning	
C,C++	Neural Networks	

EDUCATION

Bachelor of Technology in Information Technology

Aug 2023 - July 2027

MIT, Anna University

- Relevant coursework in Artificial Intelligence, Machine Learning, and Software Engineering.

ADDITIONAL INFORMATION

- Languages:** Tamil, English, Hindi
- Certifications:** Supervised Machine learning
- Hobbies/Interests:** Chess (FIDE-rated player), Astronomy, Coin Collection, and Exploring AI Innovations.
